Interinstitutional Graduate Program in Statistics (PIPGES) of Federal University of São Carlos with University of São Paulo promotes seminars groups (temporarily webinars, due to pandemic issues) of researches involving Probability, Statistics, Machine Learning etc. Our interest, among other things, is to stimulate the sharing of knowledge, as well as the connection between members of the program and researchers in other institutions.

Organizer

Michel H. Montoril, Department of Statistics,
Federal University of São Carlos.

THE DRASTIC UNDER- REPRESENTATION OF AFRICAN RESEARCHERS IN AFRICA- RELATED RESEARCH

In an ever more connected world one would expect to see collaborative efforts in academia build bridges between nations, continents and peoples. While the internet and digitisation have broken down boundaries and significantly lowered the financial obstacles as well as delays in time that came with international partnerships, collaborations seem to have been strengthened between industrialised nations. In this talk, I will analyse publication data of articles, notes and presentations on that reference the continent of Africa, as well as nations past or present on the continent and investigate the distribution of author affiliation within and outside the continent.

SPEAKER

Saralees Nadarajah · University of Manchester

BIO

Saralees Nadarajah is a Reader at the University of Manchester, UK. His research interests are in distribution theory and extreme value theory. He is an author/co-author of four books, and has over 900 refereed journal papers published or accepted.
